

Bycast CEO to Present on Cloud Storage at Storage Decisions Chicago 2009

Vancouver BC, Canada, May 20, 2009 – Bycast Inc., the leading provider of advanced storage virtualization software for enabling storage clouds, announced today that the company's President and Chief Executive Officer, Moe Kermani, will speak at the Storage Decisions Chicago 2009 Conference on June 1-2 on the subject of "Cloud Storage – Practice and Experience", sharing insights gained over seven years of working with service providers and IT departments to deliver cloud storage services to customers.

Mr. Kermani's presentation in the main session on Monday June 1st at 2:30 pm will illustrate the transformative nature of cloud storage, and present real-world examples where the vision of cloud storage has been realized on an enterprise scale. The presentation further discusses how the key issues of performance, privacy, security, and protection of mission-critical data have been addressed in production cloud-storage systems, and how the demanding requirements of large-scale distributed medical archives has resulted in a resilient platform for massive cloud storage systems. He will speak again at an invitation breakfast presentation Tuesday June 2nd at 8:30 am where he will further share practice and experience gained from seven years of experience enabling private and public clouds. These presentations will be of interest to all those considering the utilization or implementation of cloud storage for retention-critical data, or large-scale, long-term storage systems.

"Bycast is a leading supplier of cloud storage enabling software in the healthcare sector so their solution must meet the industry's stringent requirements for protection and availability of life-saving patient data," says George Crump, Senior Analyst at Storage Switzerland. "Due to its high standards and mission-critical environment, the healthcare industry is really a model on which all other industries should base their cloud storage strategies."

To make an appointment to meet Mr. Kermani at the conference, or to request a ticket to his limited seating breakfast presentation, contact asaliken@bycast.com
