

# Storage management products

<i>Company/Product</i>	<i>Category</i>	<i>Description</i>
<b>Akorri Inc.</b> BalancePoint Suite	Performance management	Cross-domain reporting on the performance of IT assets.
<b>EMC Corp.</b> ControlCenter 6.0	Storage resource management (SRM)	Storage management software that provides an end-to-end solution for multivendor storage reporting, monitoring, configuration and control.
<b>EMC</b> IT Process Centre	Process management	IT process automation tool that allows full automation of IT processes like storage provisioning.
<b>Hewlett-Packard (HP) Co.</b> Storage Essentials	SRM	A storage management software suite for heterogeneous network storage that monitors performance, automates tasks, and simplifies procedures and processes.
<b>MonoSphere Inc.</b> Storage Horizon	Storage capacity management	Automates storage capacity management processes by providing a unified view of current and projected storage capacity usage.
<b>Onaro Inc.</b> SANscreen	Service-level agreement and change management	Provides visibility into access paths, capacity, redundancy, storage tier and sharing model for each host in the environment. Verifies that the services delivered meet the application requirements as defined by the storage administrator. Alerts when a change to a device causes a service level to be abnormal. Root-cause analysis in the event of disruptions to storage services.
<b>Sun Microsystems Inc.</b> StorageTek Operations Manager Software	SRM	Provides open, integrated, heterogeneous storage area management to discover, visualize, monitor, report on, charge back and provision complex multivendor storage networks from a single Web-based platform.
<b>Symantec Corp.</b> Veritas CommandCentral Storage 5.0	SRM	A storage resource management application for reporting, monitoring, configuring and controlling heterogeneous storage systems.
<b>Symantec</b> Storage Foundation	SRM and other storage management functions	Based on Veritas Volume Manager and Veritas File System; provides integrated tools to manage data growth, maximize hardware investments and provide data protection.
<b>TeraCloud Corp.</b> Storage Analytics	Storage utilization analysis	Provides storage utilization analytics to pinpoint conditions and predictive events where storage utilization isn't optimized.
